

SUB SOILER

BENEFITS:

- The Sub soilers are deep tillage implements specially designed for breaking up hard pan layers and loosening the subsoil allowing better drainage, root growth and mineral osmosis.
- The heavy duty chisel pointed share shatters the soil well below the surface, thus increasing the water holding capacity.
- It preserves moisture during high rainfall which is very important for the crop to withstand low rainfall or drought periods.
- It is an inexpensive implement & it provides a simple and economical way to obtain boosting crop yields and profits.

FEATURES:

- It can plough up to 55 c.m. deep.
- It fights draught by increasing the ground storage capacity.
- It increases soil turnover by reaching deeper organic matter layers.
- Adjustable ploughing width.
